

17th Forum of the Adriatic Ionian Chambers of Commerce & 18th Forum of the Adriatic and Ionian Cities

7th-9th June 2017

Michael Berz
DG for Internal Market, Industry, Entrepreneurship and SMEs
Unit GROW.F.3 – KETs, Digital Manufacturing and Interoperability

WHY DO WE NEED A DIGITAL SINGLE MARKET?

European
Commission

Digital matters to European economy

75% of the **economic value** created by the Internet arises from traditional companies

1.5m **additional jobs** would be created in the EU Internet Economy, if the entire EU mirrors the performance of US or Sweden

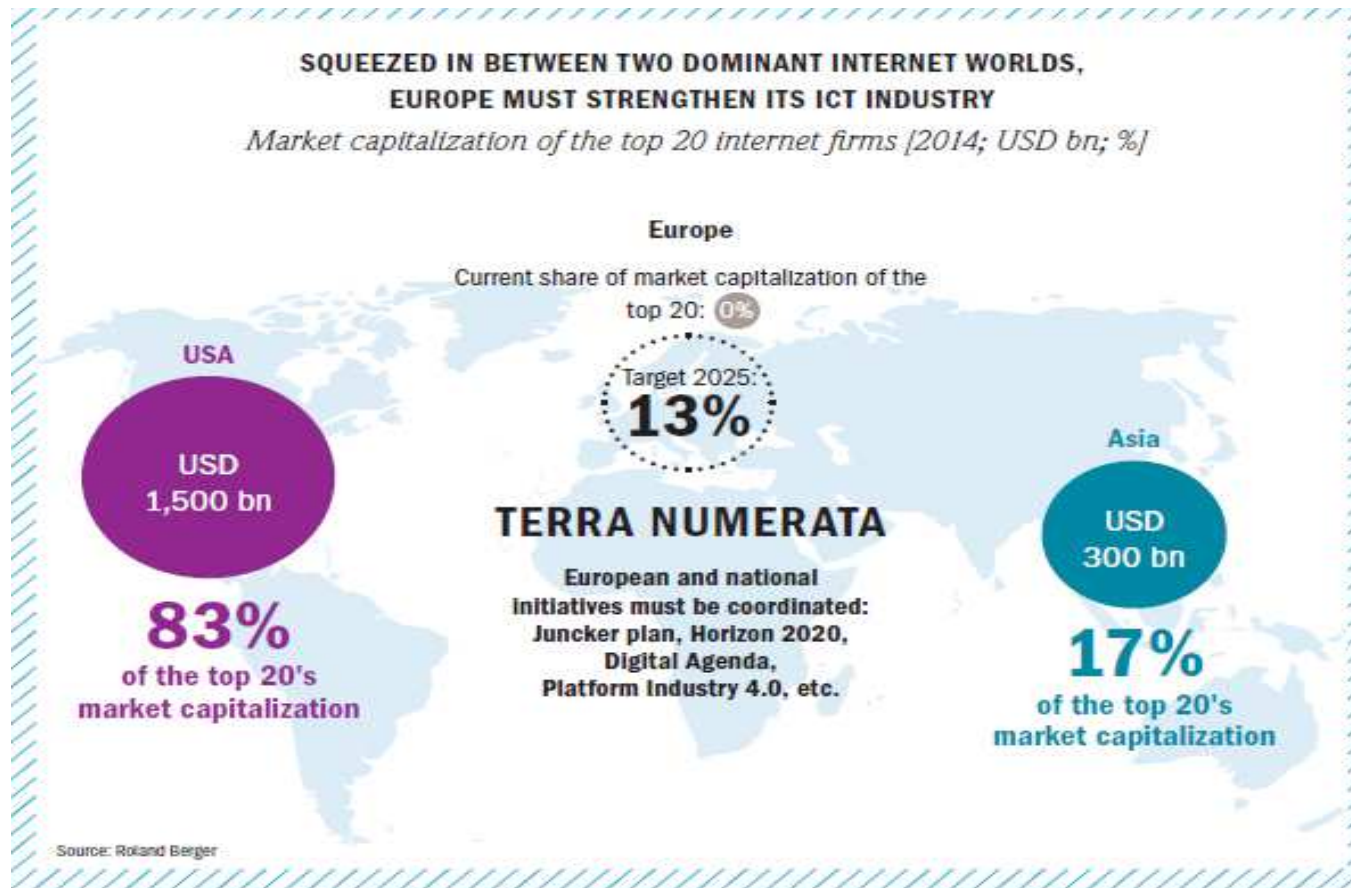

SMEs **grow** two-three times **faster** when they embrace digital means

European
Commission

4th Industrial Revolution – Clash of the Titans

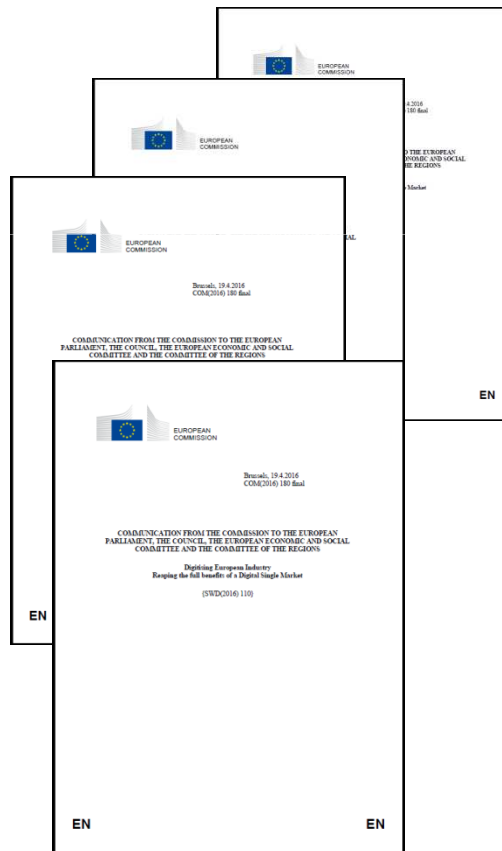

European
Commission

DSM technologies and public services modernisation package

Communications adopted on 19 April 2016

- **Communication on Digitising European Industry: Reaping the full benefits of a Digital Single Market**
- **Communication on a European Cloud Initiative- Building a competitive data and knowledge economy in Europe**
- **Communication on an EU e-Government Action Plan 2016-2020. Accelerating the digital transformation of government**
- **Communication on Priorities of ICT Standardisation for the Digital Single Market**

Digitising European Industry

To facilitate coordination of European, national & regional initiatives
such as Industrie 4.0 (DE), Smart Industry (NL) (SK), Nouvelle France Industrielle (FR)

Mainstreaming digital innovation across all sectors:

Setting up a pan-European network of Digital Innovation Hubs

Strengthening leadership in digital technologies

- Public-Private Partnerships
- Industrial platforms
- Large scale pilots & test beds

Preparing People for the digital age: Skills & Training

Regulatory framework:

- Free flow of data & data ownership
- Safety & liability of autonomous systems & Internet of Things

Challenges & opportunities of the
Internet of Things

CLOUD

European Cloud Initiative in a data-driven economy:

- European Open Science Cloud
- European Data Infrastructure
- Widening access & building trust

High Performance Computing

Quantum

STANDARDS

Fast development in 5 priority areas:

- 5G
- Cloud Computing
- Internet of Things
- Data Technologies
- Cybersecurity

DIGITAL PUBLIC SERVICES

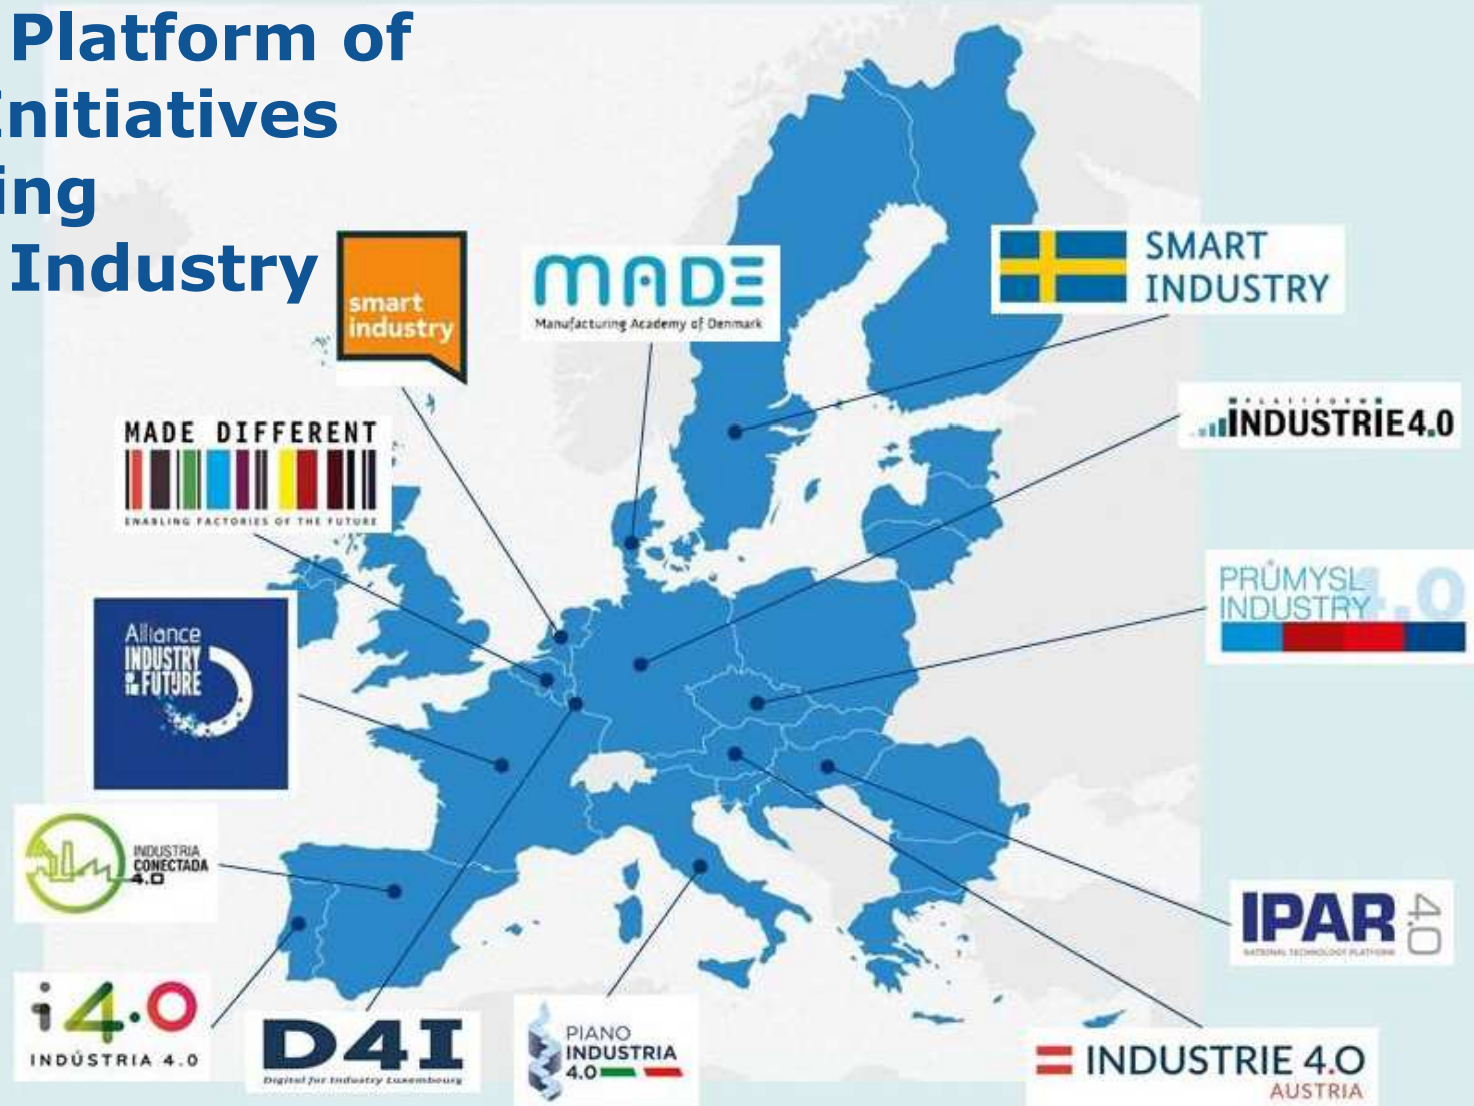

eGovernment Action Plan:

- New Digital Single Gateway
- eJustice Portal
- “Once-only” principle in Administrations
- Cross-border Health services
- eProcurement & “Once-only” in public procurement

European Platform of National Initiatives on Digitising European Industry

European Platform of National Initiatives on Digitising European Industry

High Level Roundtables

- Representatives MS, industry, social partners; twice a year
- Preparatory activities in specific working groups
 - WG1 Mainstreaming digital innovation across all sectors (Digital Innovation Hubs)
 - WG2 Leadership in digital technologies value chains and platforms
 - Linkages with existing working structures for discussions on 'Jobs and Skills', 'Regulatory issues such as data economy' and ICT Standardisation'

European Stakeholder Forum, 1st Forum on 31 Jan/1 Feb 2017 in Essen

- Public event, held once per year and co-hosted by MS

Digital Day' on 23 March, in Rome

- EU Platform of National Initiatives' on digitising industry

European
Commission

Digital Innovation Hubs - Mainstreaming digital innovation across all sectors

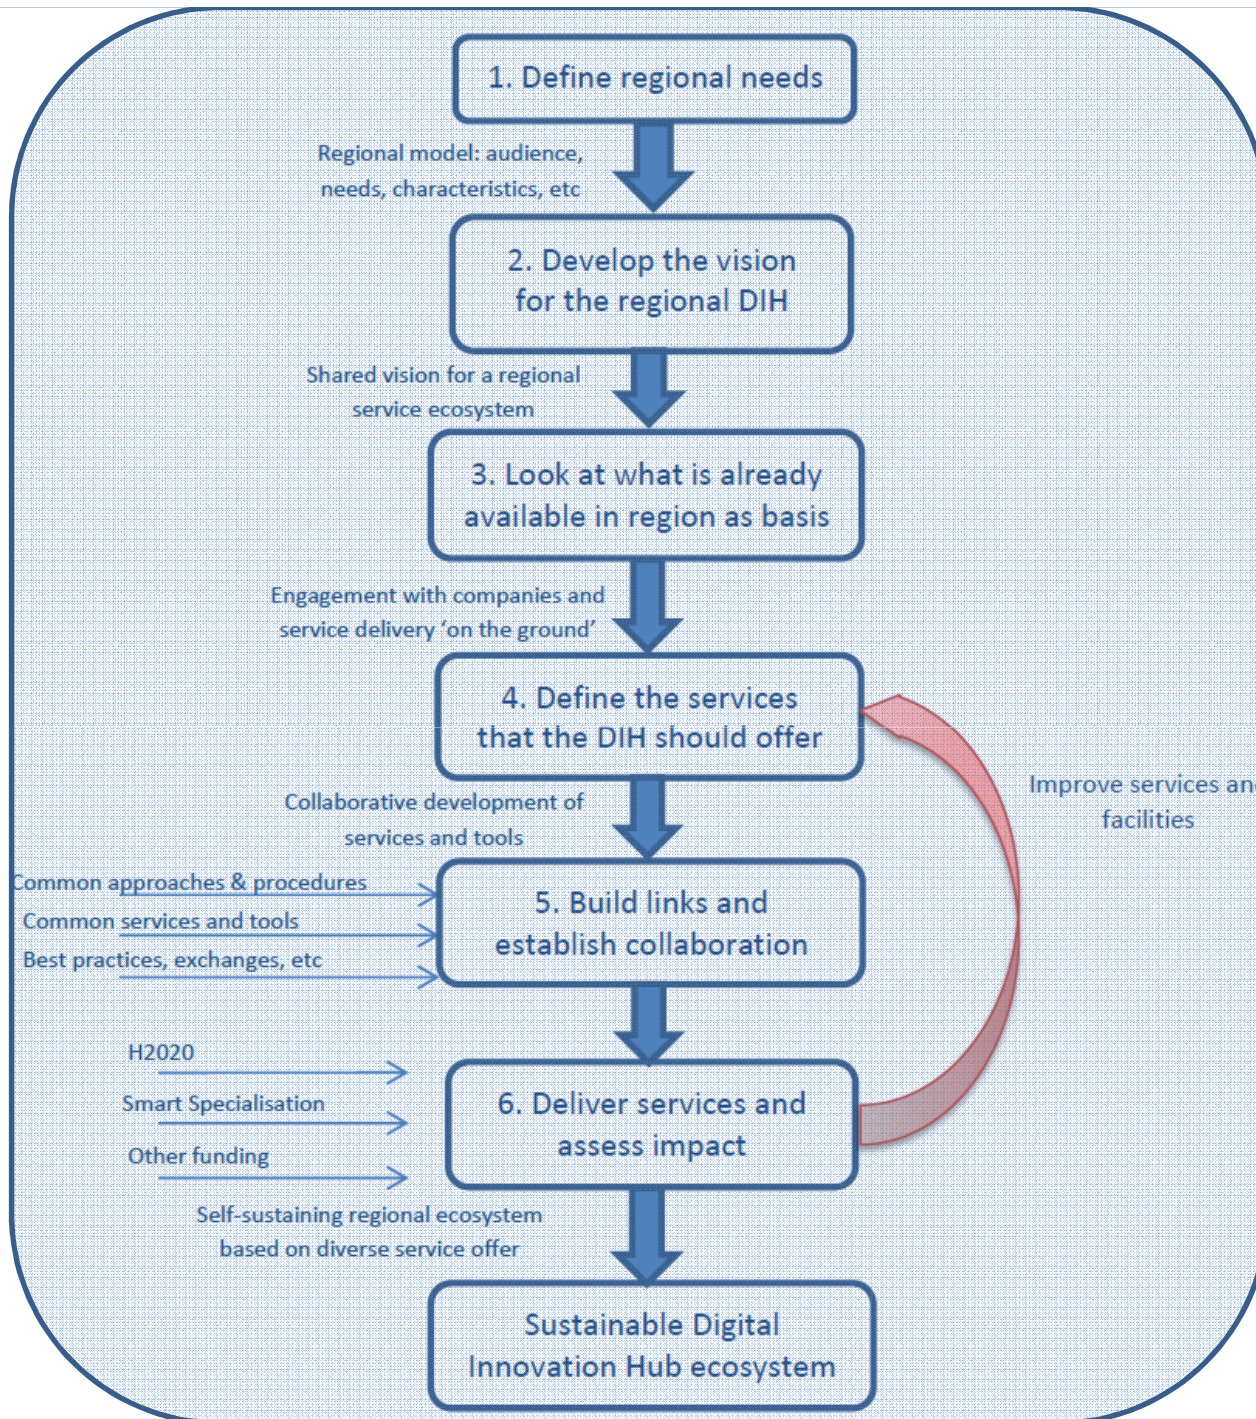

The Digital Innovation Hub Model

A Blueprint for Digital Innovation Hubs

To operationalise Digital Innovation Hubs in Europe, offering 'a recipe' for any national or regional authority or innovation intermediary wishing to establish a DIH or expand an existing initiative.

A Blueprint for Digital Innovation Hubs

	European Commission	Member States & regional authorities	Innovation intermediaries*	Industry
Rec 1: Develop the information base	⊙⊙⊙	⊙	⊙	⊙
Rec 2: Share experiences across MSs & regions	⊙⊙⊙	⊙⊙	⊙	⊙
Rec 3: Ensure high-level political support	⊙⊙⊙	⊙⊙		
Rec 4: Utilise H2020 funding		⊙⊙⊙	⊙⊙	⊙⊙
Rec 5: Launch pilot actions for collaboration and LSIs	⊙⊙	⊙⊙⊙	⊙⊙	⊙
Rec 6: Intensify outreach to regions		⊙⊙⊙	⊙⊙	⊙
Rec 7: Mobilise Member State investment		⊙⊙⊙	⊙⊙	⊙
Rec 8: Activate the European DIH network		⊙⊙	⊙⊙⊙	⊙⊙

⊙⊙⊙ = Lead responsibility; ⊙⊙ = Major participant; ⊙ = Minor participant

* includes existing DIHs and CCs.

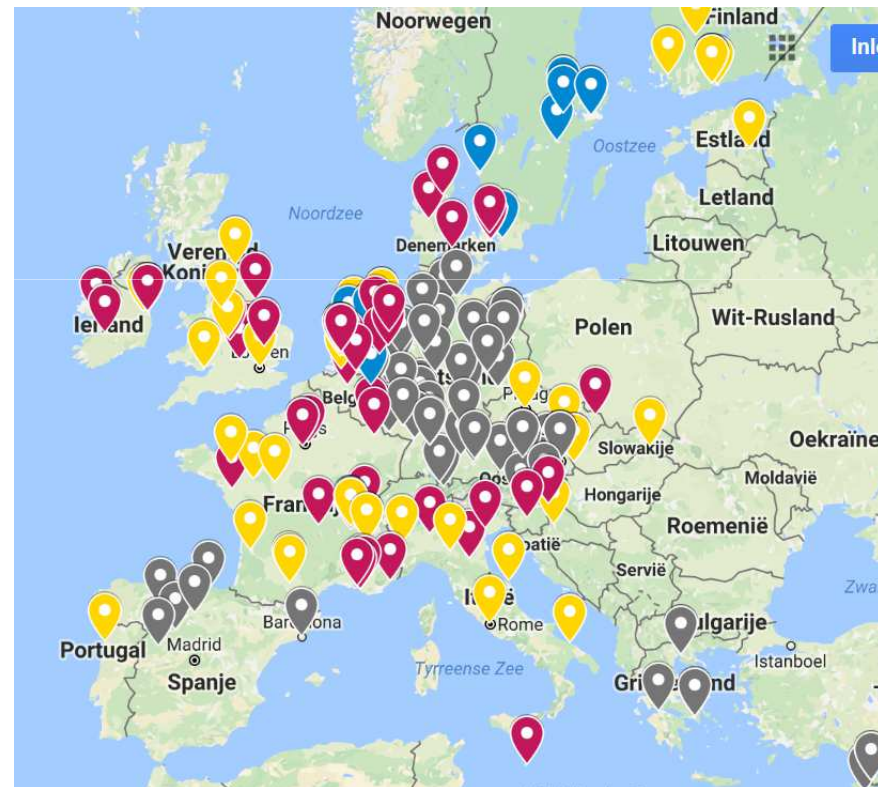

European
Commission

Digital Innovation Hubs Catalogue

Comprehensive information on the digital innovation hubs in Europe to give any SME or industry access to the exact competence fitting its needs in order to digitize its products and services.

Digital Transformation Monitor

European
Commission

The screenshot shows the homepage of the Digital Transformation Monitor. At the top, there is a navigation bar with links for 'Legal notice', 'Cookies', 'Contact', and 'Search'. Below this is the European Commission logo and the title 'DIGITAL TRANSFORMATION MONITOR'. A secondary navigation bar includes 'Home', 'Sector', 'Technology', 'Challenges', 'Policy', 'SCOREBOARD', and 'Data explorer'. The main content area features a large image of industrial machinery with the text 'State of play and key trends of digital transformation in Europe'. Below this, there are three columns of featured reports: 'Health' (Uptake of digital solutions in healthcare industry), '3D printing' (The disruptive nature of 3D printing), and 'Business' (Transform your local population into digital talents). Each report has a 'Read more' link.

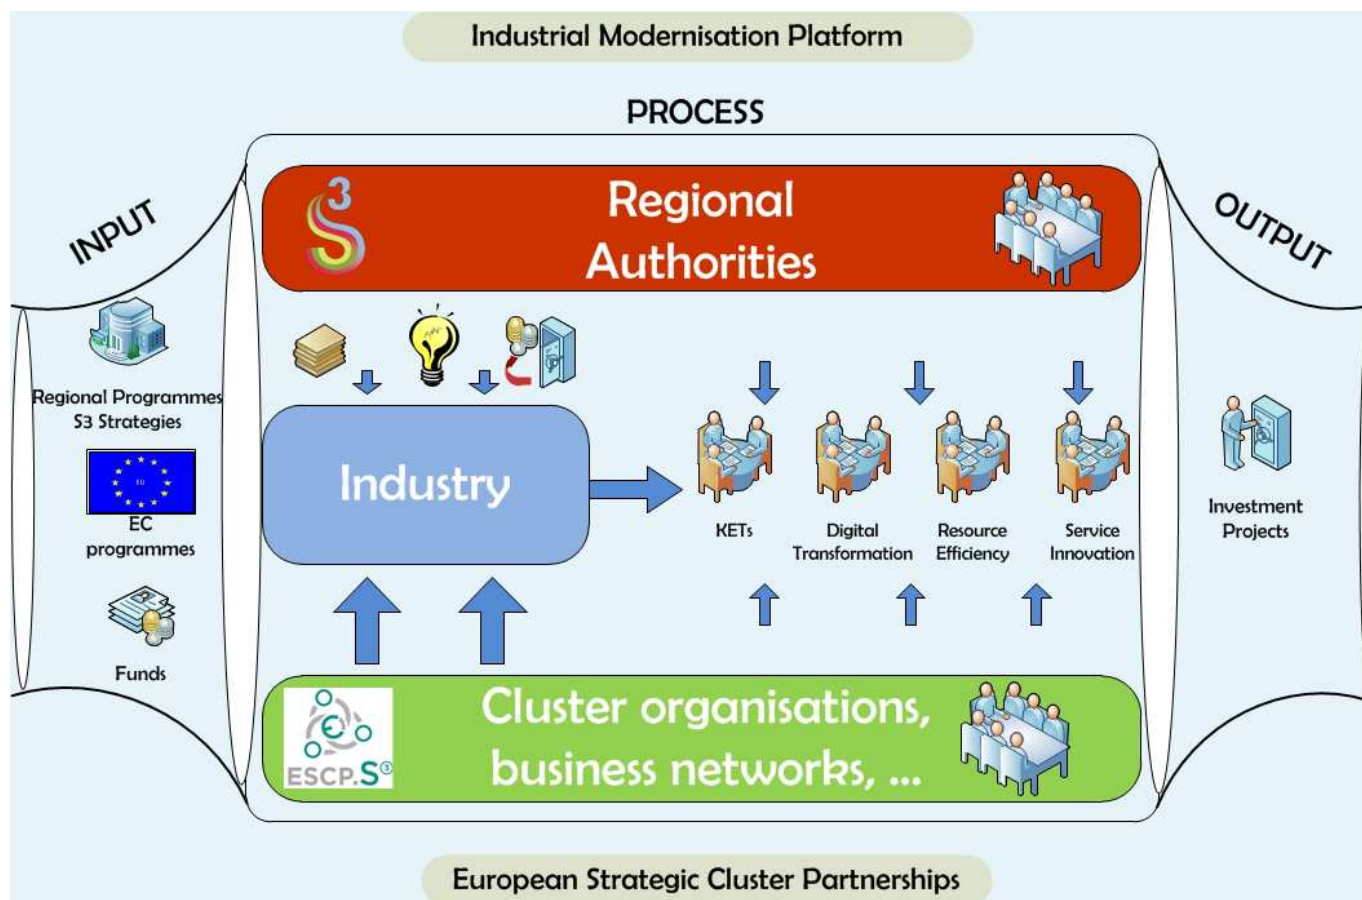

The infographic illustrates the structure of the Digital Transformation Monitor (DTM). It is divided into four quadrants around a central circle labeled 'DTM Digital Transformation Monitor'.
- **Technology reports** (top-left, orange): Focuses on disruptive innovations. Examples include 'The disruptive nature of 3D printing: offering new opportunities for verticals' and 'Autonomous driving: a big opportunity for European industry'.
- **Industry reports** (top-right, blue): Aim to understand digital uptake in specific industries (automotive, healthcare, pharmaceutical, mechanical engineering). Examples include 'Uptake of digital solutions in healthcare industry' and 'The race for automotive data: manufacturers vs digital players'.
- **Challenge reports** (bottom-left, green): Intend to understand challenges hindering novel technologies. Example: 'Big data: a complex and evolving regulatory framework'.
- **Policy reports** (bottom-right, orange): Focus on national and local strategies for digital transformation. Examples include 'Industry 4.0, Smart Industry, Industry du Futur, Produktion2030, Catapult' and 'Case studies on Barcelona, Hamburg, Espoo, Bristol, Trento, Tallinn, Nice'.

The Digital Transformation Monitor (DTM) aims to foster the knowledge base on the state of play and evolution of digital transformation in Europe. The DTM provides a monitoring mechanism to examine key trends in digital transformation. It offers a unique insight into statistics and initiatives to support digital transformation, as well as reports on key industrial and technological opportunities, challenges and policy initiatives related to digital transformation.

Upcoming initiatives by the EC: Transforming Regions and Cities into poles of Digital Transformation

Cities can create the right environment **to accelerate the digital transformation** of businesses, organizations, public administrations and improve the lives of their citizens.

Blueprint for cities and regions

- ✓ **Creation of the right environment** to accelerate the digital transformation of businesses and organisations and improve the life of citizens
- ✓ Based on analysis of qualitative data collected from **different city stakeholders acting in different contexts** and in territories with uneven levels of economic and digital maturity

Digital transformation initiatives and best practices

There is significant scope for businesses, organisations and citizens from the same or different territories to collaborate and learn from one another. The examples below provide illustrations of different initiatives, collaborative projects, organisational structures, policy measures and programmes created by ambassadors for digital transformation at the local level. The uptake of similar initiatives is key to accelerate the digital transformation of Europe's cities and regions.

Bristol

BRISTOL IS OPEN

Opening up access to city data to facilitate the development of new solutions to local urban problems

- Bristol City Council is set to transform the way it works by embracing the 'Internet of Things' embedded in the world, assisting international citizens in their quest to become smarter and more digitalised
- The council intends to establish the first ever smart city operating system that is open to all, allowing the city to experiment after hours to meet the demands of developers and service providers

New York

Games facilitating technologies and intellectual property

- NYU's seed-stage venture capital fund invests exclusively in startups from current NYU students, faculty members, and researchers

Amsterdam

amsterdam sharing city

Bringing together local ambassadors and community stakeholders to drive the digital sharing economy

- The digital sharing city is a light, initiative connecting different local stakeholders to harness the opportunities of the sharing economy in the city
- Amsterdam has become the first 'Sharing City' of Europe. The city is based on the idea of sharing resources, such as the innovative platform Peerby, it also offers extensive digital infrastructure, services and tools which have enabled the Sharing City to come alive

Luxembourg

Public-private partnership for digital retraining

- The "fit4coding" programme was established by Luxembourg's job centre with the support of major companies and co-financed by the European Social Fund
- The programme is aimed at new Web3 users who are looking for jobs in the digital sector and it provides job seekers with the required skills to work as integrators or junior developers

Barcelona

Rethinking the smart habitat with the help of digital technologies

- The FabLab Barcelona is one of the leading laboratories of the worldwide FabLab network
- The FabLab Barcelona actively supports and provides smart devices for data collection by individuals in the development of the new generation of Fab Labs in the Green Fab Lab project or in the new production models for citizens with the Fab City project.

Lisboa

Reinventing entrepreneurship to guarantee their success

- The Start-up Lisboa business incubator selects the most innovative and promising startups, offering development, web platforms, and subsidies
- The private non-profit organization developed by Lisbon Municipality provides entrepreneurs and companies with office space and a support structure, thus maximizing their chances of success

Lund

Connecting actors and problem solvers in an open innovation process

- Future by Lund is an innovation platform stimulating an entrepreneurial culture focused on the city's major challenges, such as energy, mobility, digital systems, and lighting and illumination
- Future by Lund does not only connect local stakeholders, the platform also serves to assist them throughout their digital initiatives in an open innovation process

Hamburg

Going digital to enhance the efficiency of businesses

- smartUP!T Legende (SP) is one of the most innovative digital solutions in Hamburg
- The SAP Commercial Logistics brand solution manages the traffic by interconnecting businesses, partners and customers of the port

Nice

Tracking the latest technological advances to anticipate changes

- As an authority has been gathering businesses and started by the problems of Amadeus, the global IT company, was created by the economic development agency of the region, the "Cote d'Azur". This strategic brand enables the leaders of the agency to keep pace with the latest technological advances likely to have an impact on the region's economy

Trento

Opening up and using mobility data to improve urban mobility solutions

- The Mobility Data Platform (MDP) was created by a local start-up, Locam SP, to optimise public means of transport services
- The major step that led to the development of OpenMove was the decision taken by the Trentino Alto Adige region to use the MDP to improve urban mobility through Open Move App, which allows citizens to track their mobility, parking, bike, and walk tickets both for urban and extra-urban routes; the validation is possible on-board by showing the QR code

Łódź

Creating supportive environments for entrepreneurs and technology startups

- The Łódź Innovation Centre (LIC) is a Special Economic Zone, especially innovative zones, to reinvigorate businesses, expanding business in comprehensive IT services, entrepreneurship and development

Tallinn

Collaborating to design intelligent urban digital services

- Tallinn is collaborating closely with the private sector and academia to achieve many successes in the fields of energy, transport and smart cities
- The FINEST Teams Center of Excellence is the Best SME centre, border Smart City master of excellence and Smart Lab

Espoo

Modeling specific enabling factors employees to find new jobs and launch their ventures

- Nokia launched the "to-Go" programme in 2011 to provide new career opportunities to its laid-off employees
- The city of Espoo along with the national government, Nokia and education providers have created a network of entrepreneurs and social start-up ventures. The programme contributed to the creation of more than 400 companies in Finland, with 40% of firms operating in the ICT sector

Upcoming initiatives by the EC: Transforming Regions and Cities into poles of Digital Transformation

**Overall Budget :
2.8 million EUR**

**Call for
Expression of
Interest for
Cities in June
2017**

**Development
of digital local
ecosystems**

**Development
of EU-wide
interregional
collaborations**

Upcoming initiatives by the EC: Transforming Regions and Cities into poles of Digital Transformation

The objective is to:

- join-up regions and cities in a dynamic Network, support experimentation, cross-regional partnerships and joint investments in digital transformation in the context of the Smart Specialisation Platform on Industrial Modernisation.
- Provide high-level professional expertise and advisory services to help some 15 model regions and cities develop initiatives on smart sustainable growth, digital skills and entrepreneurship, access to data and technologies and new technological infrastructures (cyber-physical systems).
- Identify the main obstacles and challenges for the creation of innovation ecosystems and underline the key success factors of the strategies and common projects being implemented.

Upcoming initiatives by the EC:

Big Data and B2B platforms: the next big opportunity for Europe (COSME 2017)

Objectives:

- accelerate the uptake of data-driven business models and sector-specific B2B platforms by European SMEs;
- stimulate strategic investments on European data infrastructures and facilitate use of relevant EU and national funding programmes;

The action focuses on marketable infrastructures and pilot projects. It shall:

- develop **common guidelines on safe data usage**.
- explore the feasibility of, pilot, promote and stimulate strategic investments in high-impact projects for:
 - **connected and automated driving**
 - **Unified European diabetes-related data-sets and applications**
- identify market deficiencies, regulatory and other technical of trade barriers and formulate policy recommendations and actions plans for coordinated EU and national  policy actions.

Blueprint for Sectoral Cooperation on Skills

New Skills Agenda for Europe (10 June 2016)

Sectoral skills partnerships, in industry and services, will be set up at EU level and then rolled out at national (or, when relevant, regional) level to:

- *Improve skills intelligence and tackle skills shortages in economic sectors;*
- *Mobilise and coordinate key players;*

Watify

is

an awareness-raising campaign to support the EU efforts to **stimulate the modernisation of Europe's industry** by:

- *Boosting the **technological transformation** of European SMEs*

boost and facilitate

**SUCCESS
STORIES**

of technological transformation

Boosting Technological Transformation

Watify

- *Supporting Europe's regions to translate their smart specialisation strategies in the areas of **digitisation and KETs** into concrete projects.*

How?

- **boost and facilitate** technological transformation in SMEs and between regions and cities through business and regional intermediaries.
- **connect** SMEs and stakeholders by facilitating the sharing of best practices, lessons learnt and new transformation ideas for advancement and by encouraging collaboration on joint projects.
- **inspire** SMEs and local stakeholders to transform and work together to take full advantage of digitisation and Key Enabling Technologies (KETs).
