

## A camping touristic agency for the middle and high schools

- **Removing children from internet and electronic devices towards art and sport**

## The aim of this project

- Create an inspiring environment
- Getting children and teenagers to know more about culture and nature
- Help them to improve knowledge and skills by having different activities.

- The plan is to first discuss and explore the idea and the benefits with the board of the teachers and parents in a few different schools in some different cities in Albania .
- There are planned a few activities and visits during the school year , as for summer will be possible also the summer camp choice .
- The agency will give the children the possibility to visit different touristic places  
To interact with each other by having picnics , historical visits in museums etc  
In this way also they will get to know more the country and culture
- The camp programme will also provide lectures on Music , Sport and Art.  
In this way each kid will find the field in which is more interested about and develop more knowledge .

How this project will help ?

The participants will build social , athletic and educational skills .

° They will learn in a young age about the potencial and possibilities that their cities can offer for their future .

The tourism will benefit from these visits and camps in different areas also.
