Poštovani,

čast mi je i zadovoljstvo pozvati vas na **SED 2019 / Summit energetske demokracije** koji će se održati **od 10. do 12. travnja 2019. godine u Puli**.

Summit energetske demokracije je krovni događaj projekta u koji je uloženo nekoliko godina istraživanja te summit koji pokriva sve ključne aspekte i složenu problematiku vezanu uz najširi pojam energetike. Pojam energetske demokracije nije odabran slučajno, pošto upravo demokracija sugerira najvišu razinu odgovornosti i suodgovornosti za budućnost planeta, kroz energetske politike, tehnološki razvoj, međunarodnu i regionalnu suradnju, hrabrost i viziju u iskoracima.

Summit energetske demokracije okupit će vrhunske domaće i međunarodne stručnjake, poslovne lidere i kreatore energetskih i industrijskih politika, kako bi razgovarali o važnim temama koje oblikuju industrije. Odgovore na pitanja ključna za naš svakodnevni život sudionici će čuti od vrhunskih lidera industrije, a **SED 2019** je ujedno i mjesto susreta sa stručnjacima iz povezanih industrija kao što su internetska sigurnost, „big data“ ili internet stvari (IoT).

Prioriteti energetske politike RH do 2030. godine s pogledom na 2050. godinu te izrada nove energetske strategije bit će u središtu zanimanja **SED 2019**, jednako kao i širi regionalni kontekst složenosti energetskog sektora i sigurnosti opskrbe. Jednako tako, važne tematske cjeline činit će problematika reforme institucionalnog okvira u energetskom sektoru, provedba kratkoročnih sektorskih mjera u cilju pokretanja gospodarskog rasta te pokretanje srednjoročnih i dugoročnih mjera po pojedinim energetskim podsektorima. Osobita pozornost bit će posvećena energetske demokraciji u najširem smislu kao i promociji naprednih energetskih mreža.

Skup se obraća širokom spektru dionika u rasponu od države, lokalnih zajednica, gospodarskih subjekata, znanstvenih i obrazovnih institucija i udruga građana te okuplja vrhunske stručnjake koji će tumačiti i raspravljati o najvažnijim aktualnim trendovima u energetici.

Pozivam Vas da svojom nazočnošću i aktivnim sudjelovanjem pridonese uspjehu summita s ciljem proširivanja dosadašnjih iskustava i usvajanja novih stručnih i znanstvenih spoznaja.

S poštovanjem,

dr. sc. Goran Granić,
predsjednik summita

Dear all,

It is my pleasure to invite you to **SED 2019 / Energy Democracy Summit**, which will be held **from 10th to 12th April, 2019 in Pula, Croatia**.

Energy Democracy Summit is the main event of a project in which several years of research were invested and a summit that covers all key aspects and complex issues related to a broader concept of energy. The notion of energy democracy has not been chosen accidentally, since democracy suggests the highest level of responsibilities for the future of the planet, through energy policy, technological development, international and regional cooperation, courage and vision.

Energy Democracy Summit will bring together top domestic and international experts, business leaders, energy and industrial policy makers to discuss important industry-shaping topics. Answers to questions that are key to our everyday lives participants will hear from top industry leaders, and **SED 2019** tends to be a meeting place for all experts from related industries such as internet security, “big data” or the Internet of Things (IoT).

The priorities of the energy policies of the Republic of Croatia by the year 2030, with a view to the year 2050, along with the development of a new energy strategy will be at the center of the occupation of **SED 2019** as well as the wider regional context of the complexity of the energy sector and security of supply. Reform of the institutional framework in the energy sector, the implementation of short-term measures in order to trigger economic growth and the launch of mid-term and long-term measures for particular energy sectors will also be important thematic units. Special attention will be devoted to the energy democracy in the widest sense as to the promotion of advanced energy networks.

The summit addresses a broad spectrum of stakeholders ranging from states, local communities, business entities, scientific and educational institutions and citizens' associations and brings together top experts to explain and discuss the most important current trends in energy sector.

I invite you to contribute to the success of the summit with your presence and active participation with the aim of expanding past experiences and adopting new professional and scientific findings.

Respectfully yours,

Goran Granić, *phD*
President of the Summit
